

TRAINING AND TUTORING FOR PROFESSIONALS

in nuclear safety, nuclear security
and human & environmental
radiation protection

The European Nuclear Safety Training and Tutoring Institute, ENSTTI, is an initiative of the European Technical Safety Organizations Network-ETSON. ENSTTI provides vocational training and tutoring in methods and practices required to perform assessments in nuclear safety, nuclear security and radiation protection. ENSTTI calls on European TSO expertise to maximize the transmission of knowledge and proficiency based on practical experience and culture.

ENSTTI provides training for experts and engineers in techniques, methods and practices for assessing and analysing nuclear and radiological risks.

TRAINING AND TUTORING WITH AN INTERNATIONAL PROFILE

- The Institute contributes to the harmonization of nuclear safety and security practices and networking today and tomorrow nuclear safety experts in Europe and beyond.
- ENSTTI offers short applied training sessions or tutoring periods for junior professionals or new comers and those who have professional experience in the nuclear field.
- The lecturers and trainers are all recognized experts in their technical area within European Technical Safety Organizations.
- The trainees have the opportunity of sharing their experience with top experts in nuclear safety, nuclear security and radiation protection.
- **Training and tutoring lead to a certificate.**

Training and tutoring can be supported through IAEA and the European Union fellowship programs.

Fields

- Reactors safety
- Radiation protection
- Nuclear security
- Fuel cycle safety
- Environment surveillance and monitoring
