

RISKAUDIT

IRSN/GRS International

OUR OBJECTIVES

The main objectives of **RISKAUDIT** are three-fold:

- strengthen and enhance a common European approach to nuclear safety;
- constitute and maintain a centre of expertise qualified to provide in-depth and independent support to nuclear regulatory authorities in the safety assessment of nuclear projects;
- contribute to the improvement of nuclear safety and radiation protection through the management of joint international projects, in particular those funded by the European Commission and by the European Bank for Reconstruction and Development (EBRD), encompassing countries in Central and Eastern Europe, Asia, North Africa, South and North America.

OUR EXPERIENCE

RISKAUDIT has unique experience in bringing together a team of renowned, active and dedicated European experts with excellent credentials and long-term experience. Its parent companies and partner organisations unite best practices, know-how and the highest standards in nuclear safety and radiological protection, notably in the following areas:

- transfer of European regulatory methodologies and practices to nuclear safety authorities;
- support to authorities during the licensing, operation and backfitting of nuclear power plants;
- support to authorities in the review of safety analysis reports;
- support to authorities in the management of radioactive sources, emergency preparedness and management, and radiological protection;
- expertise in decommissioning and waste management projects;
- advice in organisational, legal and regulatory questions, including requirements of European and international nuclear law;
- organisation of on-the-job-training.

The vast potential of experts and their practical and theoretical expertise allow **RISKAUDIT** to match the stringent demands of its clients in the field of nuclear safety, radiological protection, emergency preparedness and emergency management, management of spent fuel and radioactive waste, dismantling and decommissioning of nuclear power plants, transport of nuclear materials and environmental protection.

Moreover, during its 20 years of activities, **RISKAUDIT** has always been able to establish excellent working relations with both local authorities and their TSOs. It places great importance on the working methods and the environment on the ground in order to effectively provide the European expertise in a fashion compatible with local customs and traditions.

OUR QUALITY MANAGEMENT

RISKAUDIT is certified by the TÜV Cert, Germany according to DIN EN ISO 9001:2008.
